HIDDEN WATER RISK in HOSTELS

Hostels bring people together from around the world.
But contaminated water can spread germs and
cause illness fast.
A hidden danger with **serious risk**.

1

Contamination in storage tanks

Dirt, bacteria, algae
and biofilm build up in
storage tanks and
contaminate the
stored water.

2

Contaminated water used every day

The water is used for
drinking, cooking,
showering, hand
washing, laundry
and cleaning.

3

Guests are at risk

Travelers from different
countries have different
immunity levels and are
more vulnerable to
waterborne diseases.

4

Outbreaks harm reputation & business

Illness outbreaks can
lead to negative reviews,
cancellations, legal
issues and financial
losses.

Candela UV

Protects every drop.
Protects every traveler.

Bacteria

Virus

Parasites

Safe water.
Healthy guests.
Happy stays.
Better reviews.
Stronger business.

Clean water. Healthy guests. Memorable stays.
Use Candela UV for safe & pure water.

HIDDEN WATER RISK

in COMMUNITY LIVING PLACES

We share more than just space.

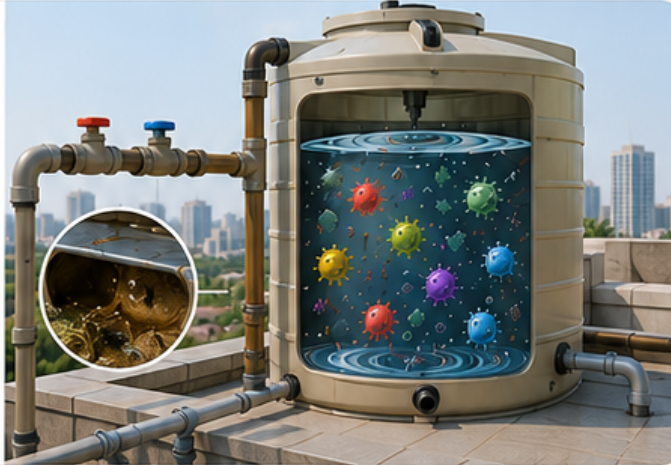

Contaminated water in community living places can spread illness quickly.

A hidden danger with **serious risk**.

1

Contamination in storage tanks

Dirt, bacteria, algae and biofilm build up in storage tanks and contaminate the stored water.

2

Contaminated water used every day

The water is used for drinking, cooking, bathing, washing clothes, cleaning and other daily activities.

3

People in the community are at risk

Children, elderly and people with weak immunity are more likely to fall sick due to contaminated water.

4

Outbreaks & higher expenses

Waterborne diseases can spread quickly, increasing medical costs, absenteeism and disruption in daily life.

Candela UV

Protects every drop.
Protects every family.

Bacteria

Virus

Parasites

Safe water.
Healthy community.
Peace of mind.
Stronger together.

Clean water is the foundation of a healthy community.
Use Candela UV for safe & pure water.

HIDDEN WATER RISK in AIRPORTS

Millions of travelers pass through airports every day.
Contaminated water can spread germs and cause illness.
A hidden danger with **serious risk**.

1

Contamination in overhead tanks

Dust, bacteria, algae
and biofilm build up in
overhead tanks and
contaminate the
stored water.

2

Contaminated water used everywhere

The water is used for
drinking, hand washing,
toilets, showers, cleaning
and food preparation
across the airport.

3

Travelers are at risk

Contaminated water can
cause stomach infections,
skin problems, respiratory
issues and other
waterborne diseases.

4

Illness outbreaks & disruptions

Sick passengers and
staff lead to medical
emergencies, flight
delays, reputational
damage and
financial losses.

DEPARTURES				
Time	Destination	Flight	Gate	Status
10:15	Paris CDG	AF1234	A12	On Time
10:20	Frankfurt	LH3678	B07	On Time
10:30	Amsterdam	KL9102	A05	Boarding
10:35	Madrid	IB3456	B11	Delayed
10:45	Rome FCO	AZ7890	A03	On Time
10:55	Zurich	LX1234	B09	On Time
11:05	Vienna	OS567	B01	On Time

HIDDEN WATER RISK in BUS TERMINALS

Thousands of people, one common resource – water.
Contaminated water in bus terminals can spread illness
fast. A hidden danger with **serious risk**.

1

Contamination in overhead tanks

Dust, bird droppings,
algae and bacteria
accumulate in
overhead tanks and
contaminate the
stored water.

2

Contaminated water used by many people

The water is used for
drinking, washing
hands, cleaning,
toilet flush and
food preparation
at the terminal.

3

People are highly vulnerable

Large number of
travelers including
children, elderly and
pregnant women are
more prone to water
borne diseases.

4

Leads to illness outbreaks & disruption

Waterborne diseases
can spread quickly,
causing absenteeism,
medical emergencies
and service
disruptions.

BUS TERMINAL

Clean water keeps everyone safe and your terminal running.
Use Candela UV for safe & pure water.

HIDDEN WATER RISK IN VEGETABLE FARMING

A 4-step journey from contamination to crop risk.

1

Contamination in irrigation source

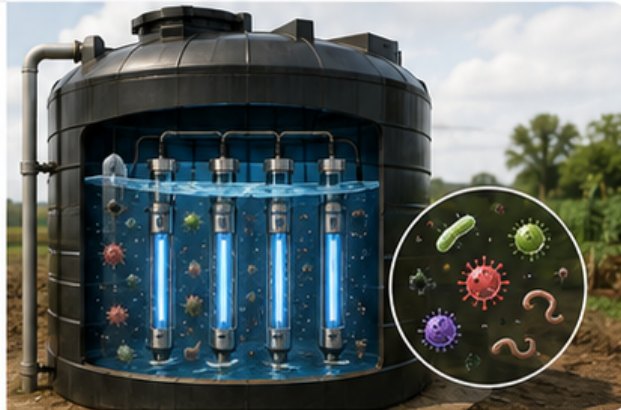

Bacteria, parasites and pollutants can enter irrigation water from surface runoff, poor storage and contaminated source water.

2

Contaminated water reaches storage tank

Unsafe water is stored for farm use and distributed for irrigation and washing of vegetables.

3

Vegetables exposed during irrigation

Contaminated water can spread harmful microorganisms onto leafy greens and other vegetables during irrigation.

4

Leads to poor crop hygiene & lower market confidence

Unsafe irrigation water can reduce crop hygiene, increase spoilage risk and affect customer confidence and farm profitability.

Candela UV

HIDDEN WATER RISK on FARMS

Contaminated water on farms can harm animals,
reduce productivity and affect your income.
A hidden threat with **serious consequences**.

1

Contamination in water source

Bacteria, chemicals
and waste seep into
groundwater and
contaminate the
stored water.

2

Contaminated water used on the farm

Contaminated water
is used for drinking,
washing animals,
irrigation and
cleaning equipment.

3

Animals become sick & stressed

Dirty water weakens
immunity, causes
diseases, poor
growth, low milk
production and
higher vet costs.

4

Lower productivity & loss of income

Poor animal health
leads to low yield,
higher treatment
costs and loss
of profits.

Candela UV

Protects your farm.
Protects your livelihood.
